

Commissioner -

I was not aware of this petition to ban the use of medically <sup>281</sup> <sup>99</sup> <sup>17</sup> <sup>P2:28</sup> ~~useful~~ antibiotics in animal feed until today. As a matter of fact I must plead absolute ignorance of its complex and ~~pot~~ potentially devastating implications, and have to wonder - "Why did this foolish practice continue until today?"

We all read or hear about one medicine after another being less and less effective. I don't know if <sup>these</sup> medications can ever be ~~made~~ ~~more~~ restored to their original potency - but, simply, it makes no sense to ~~continue~~ <sup>the wrong path</sup> once you ~~start~~.

11:00 and  
E.M. 115 20  
still
